

NestMart

E-Commerce Platform — Product Requirements Document
Total Project Value: \$6,000 | 4 Milestones × \$1,500 | Fiverr Contract

Project Name	NestMart — Modern E-Commerce Store
Platform	Web Application (Desktop + Mobile Responsive)
Document Type	Product Requirements Document (PRD) v1.0
Contract Platform	Fiverr — Fixed Price Project
Total Budget	\$6,000 USD (4 Milestones × \$1,500)
Total Timeline	10 Weeks
Client Deliverable	Full Source Code + Deployment + Documentation
Prepared By	Freelance Developer — via Fiverr
Date	April 2025

1. Executive Summary

NestMart is a fully functional, production-ready e-commerce web application built to empower modern online retail. This document serves as the complete Product Requirements Document (PRD) for the Fiverr project, defining all deliverables, technical specifications, milestone breakdowns, and acceptance criteria for a \$6,000 fixed-price engagement.

The platform will feature a professionally designed brand identity (logo + style guide), a high-performance storefront, customer authentication, product management, shopping cart, checkout with payment integration, order management, and an admin dashboard — all deployed to production.

1.1 Project Objectives

- Deliver a scalable, mobile-first e-commerce platform from scratch
- Design a unique brand identity including logo, colors, and typography
- Implement full shopping flow: browse → cart → checkout → order confirmation
- Integrate secure payment gateways (Stripe + Razorpay)
- Build a powerful Admin Dashboard for inventory, orders, and analytics
- Deploy to production with CI/CD pipeline and complete handover documentation

1.2 Scope of Work

- Brand Identity Design (Logo, Color Palette, Typography)
- Full UI/UX Design (Figma Wireframes + High-Fidelity Screens)
- Frontend Development (Next.js, React, TypeScript)
- Backend API Development (Node.js, REST)
- Database Design & Implementation (MongoDB + PostgreSQL)
- Payment Gateway Integration
- Email Notification System
- Admin Dashboard
- QA Testing, Deployment & Documentation

2. About NestMart

2.1 Brand Concept

NestMart is a modern lifestyle e-commerce store specializing in home goods, kitchenware, decor, and everyday essentials. The name "Nest" evokes warmth, home, and comfort — while "Mart" signals accessibility and value. The brand targets urban millennials and homeowners aged 22-45 who value quality, aesthetics, and a seamless digital shopping experience.

2.2 Brand Identity Specifications

Brand Name	NestMart
Tagline	"Your Home. Your Style. Your Mart."
Primary Color	#1A56DB — Deep Trust Blue
Accent Color	#F59E0B — Warm Amber (CTAs, highlights)
Background	#F8FAFC — Soft Off-White
Font (Headings)	Plus Jakarta Sans — Bold
Font (Body)	Inter — Regular / Medium
Logo Style	Wordmark + Icon mark (shopping basket with a roof/nest motif)
Logo Deliverables	SVG, PNG (transparent), PNG (white), Favicon ICO, Social Media Kit

2.3 Target Audience

- Primary: Urban homeowners & renters aged 22–40
- Secondary: Gift shoppers, interior design enthusiasts
- Geography: India-first (with international shipping capability)
- Device: 65% Mobile, 35% Desktop

3. Functional Requirements

3.1 Customer-Facing Features

3.1.1 Homepage & Navigation

- Hero banner with promotional carousel (CMS-powered)
- Featured categories grid with hover animations
- Best Sellers & New Arrivals product grids
- Promotional banners / flash sale sections
- Sticky header with search bar, cart icon, wishlist, and account menu
- Responsive hamburger menu on mobile
- Footer with links, newsletter signup, social icons, trust badges

3.1.2 Product Catalog & Search

- Category & sub-category browsing with breadcrumbs
- Advanced search with instant suggestions (Algolia-style UX)
- Filter panel: price range, brand, rating, availability, tags
- Sort options: price, popularity, newest, best rating
- Product grid/list toggle view
- Pagination with infinite scroll option

3.1.3 Product Detail Page (PDP)

- Image gallery with zoom, 360° swipe, multiple media slots
- Product title, SKU, rating & review count
- Price with discount badge, original price strikethrough
- Variant selector (size, color, quantity)
- 'Add to Cart' and 'Buy Now' CTAs
- Wishlist toggle (heart icon)
- Short description + full collapsible details tabs
- Related / Recently Viewed products section
- User reviews & ratings with verified purchase badge

3.1.4 Shopping Cart

- Slide-out cart drawer (desktop) + full cart page
- Quantity controls, item removal
- Coupon/promo code field
- Order summary: subtotal, shipping estimate, taxes, total
- 'Save for Later' / move to wishlist

3.1.5 Checkout Flow

- Guest checkout + logged-in checkout

- Multi-step: Address → Shipping Method → Payment → Review → Confirm
- Address book with saved addresses
- Shipping options: Standard, Express, Same-Day (configurable)
- Payment: Stripe (Credit/Debit/UPI) + Razorpay + Cash on Delivery
- Order confirmation page + email confirmation

3.1.6 User Account

- Registration via email/password or Google OAuth
- OTP-based login (phone number optional)
- Dashboard: Orders, Wishlist, Addresses, Profile, Reviews
- Order tracking with status timeline
- Return/refund request flow

3.2 Admin Dashboard Features

- Secure admin login with role-based access (Admin, Manager, Support)
- Dashboard overview: revenue, orders, traffic, conversion KPIs
- Product management: CRUD with bulk import (CSV), image upload
- Category & sub-category management
- Order management: view, update status, print invoice
- Customer management: view profiles, order history, ban/flag
- Coupon & discount management: fixed, percentage, BOGO
- Inventory alerts (low stock notifications)
- Sales reports & export to CSV/PDF
- Banner & promotional content management (CMS)
- Reviews moderation: approve/reject user reviews

4. Technical Architecture

4.1 Technology Stack

Layer	Technology
Frontend	Next.js 14, React, TypeScript, Tailwind CSS
Backend	Node.js, Express.js, REST API
Database	MongoDB (products/orders), PostgreSQL (auth/users)
Payments	Stripe (cards), Razorpay (UPI/India)
Auth	NextAuth.js — Email, Google OAuth, OTP
Storage	AWS S3 / Cloudinary (images & assets)
Email	Nodemailer + SMTP (order confirmations, OTPs)
CMS	Sanity.io (blog, banners, product descriptions)
Deployment	Vercel (frontend) + Railway/Render (backend)
Analytics	Google Analytics 4 + Meta Pixel

4.2 System Architecture Overview

The platform follows a modern Jamstack-influenced architecture. The Next.js frontend communicates with a Node.js/Express REST API backend. The backend handles business logic, authentication, payment processing, and data persistence. Static and media assets are served via CDN (Cloudinary/S3). The admin dashboard is a protected route within the same Next.js application.

4.3 Database Schema Highlights

- Users: id, name, email, passwordHash, phone, role, addresses[], createdAt
- Products: id, title, slug, description, price, discountPrice, images[], category, tags[], stock, variants[], ratings
- Orders: id, userId, items[], shippingAddress, paymentMethod, paymentStatus, orderStatus, total, createdAt
- Categories: id, name, slug, parentId, image, isActive
- Coupons: id, code, type, value, minOrder, maxUses, expiresAt
- Reviews: id, productId, userId, rating, comment, verified, createdAt

4.4 Security Requirements

- HTTPS everywhere (SSL/TLS via Vercel/provider)
- JWT-based authentication with refresh token rotation
- Input sanitization and SQL/NoSQL injection prevention
- Rate limiting on auth and payment endpoints
- PCI-DSS compliant payment handling (no card data stored)

- CORS policy configuration
- Environment variables for all secrets (no hardcoded credentials)

5. Project Milestones & Payment Schedule

Milestone	Scope	Amount	Timeline
Milestone 1	Discovery, Brand & Logo	\$1,500	Week 1–2
Milestone 2	UI/UX Design & Frontend	\$1,500	Week 3–5
Milestone 3	Backend, CMS & Integrations	\$1,500	Week 6–8
Milestone 4	QA, Launch & Handover	\$1,500	Week 9–10
TOTAL PROJECT VALUE		\$6,000	10 Weeks

MILESTONE 1 | Weeks 1–2

Discovery, Brand Identity & Logo Design

Payment Due: \$1,500

Milestone 1 — Scope of Work

This foundational milestone establishes the entire project blueprint and the NestMart brand identity. No development begins without client approval at this stage.

Phase 1A: Project Discovery & Planning

- Kickoff call / requirements finalization with client
- Competitive analysis (3–5 competitor e-commerce stores)
- Sitemap & information architecture definition
- User flow diagrams (customer journey + admin flows)
- Technical architecture document
- Project timeline with Gantt chart

Phase 1B: Logo & Brand Identity Design

- Brand mood board (3 directions presented to client)
- Logo design — 3 initial concepts with rationale
- 2 rounds of logo revisions included
- Final logo delivered in: SVG, PNG (transparent + white), ICO favicon
- Brand style guide document:
 - Primary & secondary color palette with hex codes
 - Typography system (heading + body font pairings)
 - Logo usage guidelines (spacing, don'ts, on dark/light bg)
 - Button, badge, and UI component styling
- Social media profile image + cover photo templates

Milestone 1 Deliverables

Deliverable	Format	Status
Requirements Specification	PDF Document	On Approval
Sitemap & User Flow Diagrams	PDF / Lucidchart	On Approval
Logo — 3 Concepts	PNG Preview + PDF	Client Review
Final Logo Package	SVG, PNG, ICO	On Approval
Brand Style Guide	PDF Document	On Approval
Technical Architecture Doc	PDF Document	On Approval
Project Timeline (Gantt)	PDF / Spreadsheet	On Approval

Milestone 1 Acceptance Criteria

- Client approves final logo (minimum 1 direction, maximum 2 revision rounds)
- Brand style guide reviewed and signed off
- Sitemap and user flows confirmed with no major structural changes
- Technical architecture document acknowledged
- \$1,500 milestone payment released upon client approval

MILESTONE 2 | Weeks 3–5

UI/UX Design & Frontend Development

Payment Due: \$1,500

Milestone 2 — Scope of Work

This milestone transforms the approved brand identity into a complete, pixel-perfect UI design system and implements the entire frontend of the NestMart platform.

Phase 2A: UI/UX Design (Figma)

- Design system component library (buttons, inputs, cards, modals, badges)
- Wireframes — all key pages (low-fidelity, for layout approval)
- High-fidelity Figma designs for:
 - Homepage (hero, featured categories, product grids, footer)
 - Product Listing Page (filters, sorting, grid/list toggle)
 - Product Detail Page (gallery, variants, reviews)
 - Cart (drawer + full page)
 - Checkout (multi-step flow)
 - User Account Dashboard (orders, wishlist, profile)
 - Admin Dashboard (overview, product table, order management)
- Mobile designs for all key pages
- Prototype with clickable flows in Figma
- 2 rounds of design revisions included

Phase 2B: Frontend Development

- Next.js 14 project setup (App Router, TypeScript, Tailwind CSS)
- Pixel-perfect implementation of all Figma screens
- Reusable React component library (30+ components)
- Homepage with all sections (static data / placeholder)
- Product Listing Page with functional filters and sort
- Product Detail Page with image gallery and variant selector
- Shopping cart with local state management (Zustand/Redux)
- Checkout flow — all steps with form validation
- User auth pages: Login, Register, Forgot Password
- Account dashboard UI (profile, orders list, wishlist)
- Fully responsive: mobile (320px), tablet (768px), desktop (1280px+)
- Page transitions and micro-animations (Framer Motion)
- SEO: meta tags, Open Graph, sitemap.xml, robots.txt

Milestone 2 Deliverables

Deliverable	Format	Status
Figma Design File (All Pages)	Figma Link + PDF Export	On Approval
Design System / Component Kit	Figma + Storybook (optional)	On Approval
Frontend Codebase	GitHub Repository	On Approval
Staging Deployment (Frontend)	Live URL	On Approval
Component Documentation	README.md	On Approval

Milestone 2 Acceptance Criteria

- All Figma screens approved by client (max 2 revision rounds)
- Frontend deployed to staging URL, visually matches Figma designs
- All pages load within 3 seconds on a standard connection (Lighthouse ≥ 85)
- No critical console errors in browser dev tools
- Mobile responsiveness verified on iPhone 12 and Samsung Galaxy S21 profiles
- \$1,500 milestone payment released upon client approval

MILESTONE 3 | Weeks 6–8**Backend Development, CMS & Payment Integration****Payment Due: \$1,500****Milestone 3 — Scope of Work**

This milestone builds the entire server-side infrastructure of NestMart — the REST API, database models, authentication system, payment gateways, email notifications, and the CMS integration.

Phase 3A: Backend API Development

- Node.js + Express server setup (MVC architecture)
- MongoDB connection with Mongoose ODM
- PostgreSQL connection with Prisma ORM (for auth/users)
- Full REST API development — documented endpoints:
 - Auth: /register, /login, /logout, /refresh, /forgot-password, /reset-password
 - Products: CRUD + search, filter, pagination, related products
 - Categories: CRUD + subcategory nesting
 - Cart: add, update, remove, apply coupon, get totals
 - Orders: create, get, update status, cancel, return request
 - Users: profile CRUD, address book, wishlist
 - Reviews: create, read (paginated), admin moderate
 - Coupons: validate, apply, CRUD (admin)
 - Admin: dashboard stats, inventory alerts, bulk actions
- API documentation with Postman collection (exported JSON)

Phase 3B: Authentication System

- JWT access + refresh token strategy
- NextAuth.js integration on frontend
- Google OAuth 2.0 social login
- Email OTP verification on registration
- Password reset via email link
- Role-based access control (customer / admin / manager)
- Session persistence and secure logout

Phase 3C: Payment Gateway Integration

- Stripe integration (credit/debit cards, international)
- Razorpay integration (UPI, NetBanking, Indian cards)
- Cash on Delivery (COD) option with admin toggle
- Webhook handlers for payment success/failure/refund events
- Test mode configuration with provided test credentials

- Payment status tracking tied to order lifecycle

Phase 3D: Email & CMS

- Transactional emails via Nodemailer:
 - Order confirmation with itemized receipt
 - Shipping confirmation with tracking link placeholder
 - Account registration welcome email
 - Password reset email
- Sanity.io CMS setup and schema creation for:
 - Homepage banners and promotional sections
 - Blog / Content pages
 - Featured product selections
- Sanity Studio deployed and accessible to client

Milestone 3 Deliverables

Deliverable	Format	Status
Backend Codebase	GitHub Repository	On Approval
Postman API Collection	JSON Export	On Approval
Database Schema Diagram	PDF / dbdiagram.io	On Approval
Staging Full-Stack Deployment	Live URL	On Approval
Sanity CMS (Studio)	Live URL + Guide	On Approval
Payment Test Confirmation	Screenshots / Recording	On Approval
Email Templates Preview	HTML + Screenshots	On Approval

Milestone 3 Acceptance Criteria

- All API endpoints return correct responses as documented in Postman collection
- User can register, login (email + Google), and access protected routes
- A test order can be placed end-to-end (product → cart → checkout → payment)
- Stripe & Razorpay test payments process successfully (no real charges)
- Order confirmation email received within 60 seconds of test order
- Sanity CMS content changes reflect on staging frontend within 5 minutes
- \$1,500 milestone payment released upon client approval

MILESTONE 4 | Weeks 9–10**QA, Performance Optimization, Launch & Handover****Payment Due: \$1,500****Milestone 4 — Scope of Work**

The final milestone focuses on comprehensive quality assurance, performance tuning, production deployment, and a complete project handover package ensuring the client can manage and maintain NestMart independently.

Phase 4A: Quality Assurance & Testing

- Functional Testing — all 200+ test cases across user flows
- Cross-browser testing: Chrome, Firefox, Safari, Edge
- Device testing: Desktop (1440px), Laptop (1280px), Tablet (768px), Mobile (390px)
- Payment flow testing (all scenarios: success, failure, pending, refund)
- Form validation and error handling review
- Security audit: XSS, CSRF, injection vulnerability checks
- 404 / error page behavior
- Load testing: simulate 100 concurrent users
- Accessibility audit (WCAG 2.1 AA compliance basics)

Phase 4B: Performance Optimization

- Lighthouse audit and optimization (target scores: Performance ≥ 90 , SEO ≥ 95)
- Image optimization: WebP conversion, lazy loading, responsive srcsets
- Code splitting and bundle size optimization
- Database query optimization and indexing review
- CDN configuration for static assets
- API response caching strategy (Redis or in-memory)
- Core Web Vitals tuning (LCP, FID, CLS)

Phase 4C: Production Deployment

- Domain configuration and DNS setup guidance
- SSL/TLS certificate installation
- Frontend deployed to Vercel (production environment)
- Backend deployed to Railway / Render (production environment)
- Environment variables configured securely
- CI/CD pipeline setup (auto-deploy on GitHub push to main)
- MongoDB Atlas production cluster configuration
- Backup strategy configured (daily automated backups)
- Google Analytics 4 + Meta Pixel installation and verification
- Google Search Console sitemap submission

Phase 4D: Project Handover Package

- Source code delivered via GitHub (private repo transferred to client)
- Technical documentation:
 - System architecture diagram
 - API documentation (Postman collection + README)
 - Database schema diagram
 - Environment setup guide (.env.example)
- Admin user guide (PDF — how to manage products, orders, content)
- Deployment guide (how to redeploy or scale)
- CMS content management guide (Sanity Studio usage)
- 30-day post-launch bug support (via Fiverr messages)
- Video walkthrough of codebase and admin dashboard (screen recording)

Milestone 4 Deliverables

Deliverable	Format	Status
QA Test Report	PDF Document	On Approval
Production Live URL	Web URL	On Approval
GitHub Repository (Full Code)	Transferred to Client	On Approval
Technical Documentation Pack	PDF Bundle	On Approval
Admin User Guide	PDF + Video	On Approval
Postman API Collection (Final)	JSON Export	On Approval
Deployment & Env Guide	PDF / README.md	On Approval
Analytics Setup Confirmation	Screenshots	On Approval
Codebase Walkthrough Video	MP4 / Loom Link	On Approval
30-Day Bug Support Commitment	Fiverr Message	On Approval

Milestone 4 Acceptance Criteria

- Production site live and accessible on client's domain
- Lighthouse Performance score ≥ 90 on both mobile and desktop
- End-to-end purchase flow works flawlessly on production (live payment test)
- Admin can log in, add a product, and process an order without assistance
- All documentation delivered and acknowledged by client
- Zero critical or high-severity bugs open at handover
- \$1,500 final milestone payment released upon client approval

6. Complete Page & Screen Inventory

6.1 Customer-Facing Pages

Homepage	Hero, featured categories, best sellers, promotions, newsletter
Category Listing Page	Filters, sort, product grid, pagination
Product Detail Page	Gallery, variants, add-to-cart, reviews, related products
Search Results Page	Query, filters, no-results state
Cart Page	Items, quantities, coupon, order summary, checkout CTA
Checkout — Step 1	Delivery address form, address book
Checkout — Step 2	Shipping method selection
Checkout — Step 3	Payment method selection and entry
Checkout — Step 4	Order review and place order
Order Confirmation	Thank you page, order ID, email notification sent
User Registration	Email signup, Google OAuth
User Login	Email/password, Google OAuth, forgot password link
Forgot Password	Email input, OTP/link flow
Account Dashboard	Overview cards
My Orders	Order list with status
Order Detail	Items, tracking timeline, return/cancel options
My Wishlist	Saved products, move to cart
Address Book	Add/edit/delete addresses
Edit Profile	Name, phone, password change
404 / Error Page	Friendly error with navigation
About Us	Brand story, values, team (CMS-powered)
Contact Us	Contact form + store details
Privacy Policy	Static legal content
Terms & Conditions	Static legal content

6.2 Admin Dashboard Pages

Admin Login	Secure admin authentication
Dashboard Overview	Revenue, orders, users, top products KPIs
Product List	Table with search, filter, bulk actions
Add / Edit Product	Full product form with image upload
Category Management	CRUD for categories and subcategories
Order List	All orders with status filters and search
Order Detail (Admin)	Full order view, status update, invoice print
Customer List	User table with profile and order history links
Coupon Management	Create/edit/disable coupons
Sales Reports	Charts and CSV export
Inventory Alerts	Low stock dashboard
Reviews Moderation	Approve/reject submitted reviews
Content Management	Manage banners, homepage sections (Sanity CMS)
Settings	Shipping rules, payment config toggles, general settings

7. Non-Functional Requirements

7.1 Performance

- Homepage First Contentful Paint (FCP) < 1.5 seconds
- Lighthouse Performance score ≥ 90 (mobile and desktop)
- API response time < 200ms for product listing (cached)
- Support for 500 concurrent users without degradation

7.2 Reliability & Availability

- Target uptime: 99.5% (monthly)
- Graceful error handling with user-friendly error pages
- Automatic retry logic for failed payment webhooks
- Database connection pooling for stability under load

7.3 Security

- All data in transit encrypted via HTTPS / TLS 1.3
- Passwords hashed with bcrypt (cost factor ≥ 12)
- JWT tokens expire after 15 minutes (with silent refresh)
- Rate limiting: max 10 login attempts per 15 minutes per IP
- Admin routes protected by IP whitelist option

7.4 Scalability

- Stateless backend — horizontal scaling ready
- MongoDB Atlas auto-scaling cluster
- Vercel edge network for global CDN distribution
- Image optimization pipeline prevents storage bloat

8. Project Terms & Conditions (Fiverr)

8.1 Revision Policy

- Each milestone includes 2 rounds of revisions within scope
- Additional revisions or scope changes billed at \$50/hour
- Design revisions requested after development begins may incur extra charges
- Client must provide feedback within 5 business days per milestone review

8.2 Payment Terms

- Each \$1,500 milestone payment is due before work on that milestone begins
- Payments are non-refundable once milestone work is in progress
- Milestone funds held in Fiverr escrow until client approval
- Final source code and credentials delivered only after all payments cleared

8.3 Client Responsibilities

- Provide domain name and hosting credentials when required
- Provide payment gateway API keys (Stripe, Razorpay) for integration
- Provide product content, images, and pricing data before Milestone 3
- Designate a single point of contact for feedback and approvals
- Respond to feedback requests within 5 business days

8.4 Intellectual Property

- Upon full payment, client receives full ownership of source code and designs
- Developer retains right to display project in portfolio (no sensitive data shown)
- Third-party libraries remain subject to their respective open-source licenses

8.5 Post-Launch Support

- 30 calendar days of bug-fix support included after final delivery
- Bug = functionality not working as specified in this PRD
- New features or design changes during support period are out of scope
- Extended support packages available at \$500/month

9. Project Sign-Off

By proceeding with this Fiverr project and releasing Milestone 1 payment, the client acknowledges that they have read, understood, and agreed to the scope, deliverables, and terms outlined in this Product Requirements Document.

Project	NestMart E-Commerce Platform
Total Value	\$6,000 USD
Milestones	4 × \$1,500 (each paid before milestone work begins)
Timeline	10 Weeks from project kick-off
Platform	Fiverr Fixed Price Project
Support	30 days post-launch bug support included
